Training Questions Module For Nursing Schools

- **Year:** 2nd year
- **Subject:** Community Health Nursing
- **Chapter:** Chapter one
 - Community Health Nursing,
 - Health & Illness,
 - Healthcare Team

Prepared by

Team of Nursing Schools

2025-2026

Section 1: Community Health Nursing

▪ Multiple Choice Questions (MCQs)

1. According to the American Nursing Association (ANA), community health nursing primarily focuses on:
 - a) Treating acute illnesses in hospital settings
 - b) Promoting and protecting the health of populations
 - c) Providing surgical care to individuals
 - d) Managing pharmaceutical inventories
2. Which of the following best defines a “community” ?
 - a) A group of people living in the same city
 - b) A collection of people who interact and share common interests or characteristics
 - c) Any group of more than 100 individuals
 - d) A political entity governed by local authorities
3. What is the primary shift in focus in modern community health nursing?
 - a) From hospitals to clinics
 - b) From the sick to the well person, and from the individual to the community
 - c) From rural to urban populations
 - d) From treatment to palliative care
4. Which of the following is NOT listed as a goal of community health nursing?
 - a) To promote health and efficiency
 - b) To increase hospital admissions
 - c) To reduce health disparities
 - d) To prevent and control diseases
5. Community health nurses are best described as:
 - a) Unlicensed assistive personnel
 - b) Registered nurses trained to work in public health settings

- c) Medical doctors specializing in epidemiology
 - d) Volunteers with basic first aid training
-

▪ **True/False Questions**

1. Public health is defined as the art and science of treating chronic diseases in () individuals.
2. Community health refers only to the physical health of community () members.
3. Health services in community health nursing must be available to all without any difference. ()
4. Community health nursing does not involve conducting research. ()
5. The practice of community health nursing integrates health education, () guidance, and supervision.

▪ **Fill-in-the-Blank Questions**

1. Community health nursing combines primary healthcare and practice in a community setting.
2. A is a group of individuals involved in persistent social interaction, often sharing the same spatial or social territory.
3. One principle of community health nursing is that services should be planned based on the of the community.
4. Community health nurses provide care to ensure safe pregnancy and delivery.
5. Proper and reports are essential in community health nursing services.

▪ **Short Answer Questions**

1. List any four roles of a community health nurse.

2. Name three principles of community health nursing.

▪ **Matching Questions**

21. Match the following terms with their correct definitions:

- | | |
|---------------------|--|
| a) Public health | I) Health status of community members and the totality of health care provided for the community |
| b) Community health | II) Art and science of preventing disease and promoting health through organized community efforts |
| c) Society | III) A large social group sharing the same spatial or social territory under common authority |

Community Health Nursing _2nd year

 Section 2: Health and Illness

▪ **Multiple Choice Questions (MCQs)**

1. According to the WHO, health is defined as:
 - a) Absence of disease
 - b) Physical strength and endurance
 - c) Complete physical, mental, and social well-being
 - d) Ability to work full-time without fatigue
2. Which of the following is NOT a determinant of health?
 - a) Genetics
 - b) Income and social status
 - c) Favorite color
 - d) Physical environment
3. Primary prevention includes all of the following EXCEPT:
 - a) Immunization
 - b) Health education
 - c) Mammograms for early cancer detection

d) Encouraging non-smoking behavior

4. Tertiary prevention is primarily concerned with:

- a) Preventing exposure to pathogens
- b) Early detection of disease
- c) Managing long-term illness to improve quality of life
- d) Conducting population-level vaccination campaigns

5. Which factor is listed as contributing to good health through emotional stability?

- a) Watching television daily
- b) Close ties with family
- c) High sugar intake
- d) Frequent travel

▪ **True/False Questions**

1. Disease is defined only as an infection caused by microbes. ()
2. Stress has no measurable impact on physical health. ()
3. Secondary prevention includes rehabilitation programs. ()
4. Access to health services is a determinant of health. ()

▪ **Fill-in-the-Blank Questions**

1. The WHO definition of health emphasizes that it is not merely the absence of or infirmity.
- 2 prevention aims to reduce the impact of a disease that has already occurred.
3. One basic factor for good health is maintaining a healthy..... life.
4. Determinants of health include the social and economic environment, the physical environment, and characteristics and behaviors.
5. Daily low-dose aspirin for heart attack prevention is an example of..... prevention.

▪ **Short Answer Questions**

1. List five determinants of health.
2. Differentiate between primary, secondary, and tertiary prevention with one example for each.
3. Name four basic factors that contribute to good health.
4. Why is it inappropriate to blame individuals for poor health?
5. What are the key components of infection prevention?

▪ **Matching Questions**

42. Match each level of prevention with its correct description:

- | | |
|---|---|
| a) Primary | I) Detecting and treating disease early to halt progression |
| b) Secondary | II) Preventing disease before it occurs |
| III) Helping manage long-term illness to improve function | |
| c) Tertiary | |

Section 3: Healthcare Team

▪ Multiple Choice Questions (MCQs)

1. Which of the following is NOT listed as a member of the healthcare team?
 - a) Pharmacist
 - b) Spiritual leader
 - c) Accountant
 - d) Social worker
2. What is a key role of a pathologist in the healthcare team?
 - a) Administering vaccines
 - b) Examining body fluids and tissues to aid diagnosis
 - c) Providing dietary counseling
 - d) Performing surgeries
3. Who is responsible for checking the quality and safety of medications?
 - a) Radiologist
 - b) Dietician
 - c) Pharmacist
 - d) Physician
4. Primary care doctors primarily focus on:
 - a) Emergency trauma care
 - b) Preventive care, routine check-ups, and immunizations
 - c) Complex surgical procedures
 - d) Mental health rehabilitation only
5. Which professional helps retrain workers for new jobs after recovery from injury?
 - a) Social worker
 - b) Spiritual leader

- c) Vocational rehabilitation specialist
 - d) Neurologist
-

▪ **True/False Questions**

1. Nurses in the healthcare team only administer medication and do not coordinate with other professionals. ()
 2. Spiritual leaders are included in the healthcare team to meet patients' spiritual needs. ()
 3. Radiologists are responsible for preparing diet plans for patients. ()
 4. Healthcare is described as a team effort where each member has a special role. ()
 5. Social workers are mostly involved in mental illness support. ()
-

• **Fill-in-the-Blank Questions**

1. A.....is a group of professionals who contribute to patient care and treatment.
 - 2..... help diagnose diseases through imaging techniques like MRI and CT scans.
 - 3..... determine nutritional needs and prepare diet plans for patients.
 4. One factor that raises healthcare team efficiency is
-

• **Short Answer Questions**

1. List six members of the healthcare team.
2. Describe the roles of a registered nurse and a pharmacist in the healthcare team.
3. What are two strategies to improve healthcare team efficiency?
4. How do social workers contribute to patient care?
5. Explain the difference between a primary care doctor and a specialist.

▪ **Matching Questions**

Match each healthcare team member with their correct role:

- | | |
|--|--|
| a) Dietician | I) Uses imaging tools to visualize internal organs |
| b) Social worker | II) Observes food preparation and creates diet plans |
| III) Provides suggestions on home care and education about | |
| c) Radiologist | disease |
| d) Pathologist | IV) Examines tissues and body fluids for diagnosis |

Question Bank in Community Health Nursing

2nd year (2025-2026)

(Chapter Two)

Define the following:-

- | | |
|------------------------|--------------------|
| 1- Primary Health Care | 2- Maternal Health |
| 3- Child Health | 4-MCH services |

Complete the following:-

- 1- Important of primary health care is,.....
- 2- Maternal and child health refers to.....
- 3- Maternal health refers to.....
- 4- Early childhood follows the.....stage and begins with
..... When the child begins speaking or..... independently,
this stage continues approximately until the age.....
- 5- Middle childhood begins at around age...it ends
with.....
- 6- Adolescent is usually determined to be between the.....
and.....
- 7- The major determinates of child health are... and
.....&main effects include.....,.....,..... &.....

List:-

- 1- The components of primary health care.
- 2- The principles of primary health care.
- 3- The elements of primary health care.
- 4- Different types of teams in primary health care.
- 5- Role of Nurse in primary health care.
- 6- Objectives of MCH services.
- 7- Components of MCH services in Egypt.

Explain the following:-

- 1- The maternal mortality ratio (MMR).
- 2- Antenatal care coverage
- 3- Role of Nurse in MCH care service provider & services for mother)
- 4- Role as an administrator
- 5- Role as an Educationist.
- 6- Role as a Researcher
- 7- List the main items that indicator for child health and explain briefly some of it.
- 8- List and explain briefly **3 items** from the principles of primary health care.

Chapter three

Public health service

Second year

Q1: DefineThe following:

- | | |
|---------------------------|------------------------|
| 1- public health services | 2-official |
| 3-home visits | 4-termination phase 5- |
| public health bag | 6-family nursing |
| 7-nursing process | 8-planning |
| 9-criss | 10-referral system |

Q2:True or false:

- 1-Physical therapy including increase the mobility and strength ()
- 2-Occupational therapy is often needed after stroke ()
- 3-Home health care services may include medical social work()
- 4-Home visits require technical skills and good judgment ()
- 5- Evaluate the quality of care is not important than the number of home visits ()
- 6- Home visiting should be unplanned and random ()
- 7- Purpose of family health care services health education ()
- 8- Public health not support the operation of elderly health centers ()
- 9- Three basic elements of a crisis that include difficult in calling ()
- 10- Aspects of school health services including nutritional services ()

Q3 :- Choose the correct answer :

1- Universal public health function includes :

(Vaccination – school nursing –)

2- Skilled registered nurse have the experience to provide a number of service include :

(Wound care – infusion therapy and injection – tube feeding – all of above)

3- The main purpose of home visits all except :

(Give care to postpartum mother – assess the living condition of the patient and their family – health teaching regarding the prevention and control of diseases – ignoring family health practice)

4- Collect prevent injury information from clinical and the other records before planning for visits occur in :

(Initial phase – Action phase – Termination phase)

5- One of advantages of the home visits :

(The nurse can directly observe home and family atmosphere – it is less time consuming – there are no infection risk)

6- One of disadvantages of home visits :

(The family become more confidence – it takes time and travel efforts – it allows early detection of health problems)

7- Primary source of data :

(Friends – Client – Family records)

8- It consists of family diagnosis :

(Planning - diagnosis – assessment)

9- System of transferring cases :

(Respiratory – Referral – Circulatory)

10- Role of community health nurse in school :

(Advocate – Manager – Implementer – All the above)

Q4 :- Short essay :

1- Purpose of home visiting :

A).....

B).....

C).....

D).....

Advantages of home visits :

A).....

B).....

C).....

D).....

3- Disadvantages of home visits :

A).....

B).....

C).....

D).....

4- Characteristics of healthy family :

A).....

B).....

C).....

D).....

5- Component of referral system :

A).....

B).....

C).....

D).....

6- Types of referral system :

A).....

B).....

C).....

7- Qualities of family health nurse :

A).....

B).....

C).....

D).....

8- Purpose of school nursing :

A-

B)..... C).....

D).....

9- Role of community health nurse in school health :

A).....

B)..... C).....

D)..... E).....

F).....

10- Elderly health services include :

A).....

B)..... C).....

Q5:- Discuss :

- 1- Guidelines to consider regarding the frequency of home visit
- 2- Components of family health nursing process
- 3- Intervention of crisis

Occupational Health Nursing

I. Multiple Choice Questions (MCQs)

1. **Occupational health mainly focuses on:**

- a) **Promoting a healthy lifestyle outside the workplace**
- b) Preventing and managing health risks in the workplace
- c) Treating patients in hospitals
- d) Environmental protection only

3. According to the American Association of Occupational Health Nurses (AAOHN), occupational health nursing:

- a) Focuses only on treating workplace injuries
- b) Promotes, prevents, and restores health in a safe environment
- c) Deals only with mental health issues
- d) Excludes environmental factors

5. What is the main purpose of industrial hygiene?

- a) To design office furniture
- b) To identify and evaluate workplace hazards
- c) To manage workers' salaries
- d) To promote leisure activities

6. Which of the following is a responsibility of occupational health nurses?

- a) Marketing products
- b) Ensuring a safe and healthful workplace

- c) Managing company finances
 - d) Conducting job interviews
7. **OSHA stands for:**
- a) Occupational Safety and Health Administration
 - b) Organization for Safety and Hazard Assessment
 - c) Occupational Services and Health Association
 - d) Office for Standard Health Activities
8. Which of the following is related to employee education?
- a) Infection control
 - b) Drug awareness education
 - c) Medical record confidentiality
 - d) Injury reporting
9. What is the main goal of occupational health nursing priorities?
- a) Increasing company profit
 - b) Promoting worker health and safety
 - c) Reducing employee numbers
 - d) Conducting financial audits
10. Which of the following is an example of a health promotion activity at the worksite?
- a) Fire drills
 - b) **Stress management programs**
 - c) Employee performance reviews
 - d) Product marketing campaigns
11. Which of these is an occupational hazard for healthcare workers?
- a) Noise exposure
 - b) Chemical spills
 - c) Latex allergy and blood-borne pathogens
 - d) Poor lighting
12. What is the purpose of ergonomic strategies?
- a) To reduce worker stress
 - b) To improve company reputation
 - c) To reduce worker injury and illness
 - d) To increase working hours
13. Which factor can affect workers' rehabilitation and return to work?
- a) Job satisfaction only
 - b) Physical and psychological factors

c) Wage level

d) Age of the supervisor

14. . What is one main goal of occupational health nursing?

- A. To improve hospital management
- B. To prevent and manage work-related health problems
- C. To promote patient satisfaction
- D. To increase production levels

15. Which of the following is NOT a type of occupational hazard?

- A. Physical
- B. Biological
- C. Psychological
- D. Financial

16. Exposure to blood or body fluids can cause:

- A. Skin irritation
- B. Viral infections such as hepatitis B
- C. Bone fractures
- D. Allergic rhinitis

17. Exposure to asbestos can result in:

- A. Asbestosis
- B. Headache
- C. Anxiety
- D. Hearing loss

18. Which chemical can cause central nervous system disturbances?

- A. Lead
- B. Acids
- C. Asbestos
- D. Glycol ethers

19. Prolonged exposure to noise may cause:

- A. Back injuries
- B. Headache
- C. Hearing loss
- D. Vision problems

20. Which physical hazard is most likely to cause Raynaud's disease?

- A. Vibration
- B. Heat
- C. Noise
- d- Radiation

21. Stress at work is a type of:

- A. Chemical hazard
- B. Psychosocial hazard
- C. Physical hazard
- D. Environmental hazard

22. Which of the following is a clinical skill for occupational health nurses?

- A. Payroll management
- B. Conducting physical assessments
- C. Organizing recreational events
- D. Handling company accounts

23 . What is the main purpose of case management in occupational health nursing?

- A. Identifying and managing employee health needs
- B. Hiring new staff
- C. Organizing safety meetings
- D. Managing hospital admissions

II. True or False

1. Toxicology studies the relationship between chemical exposure and health effects.
2. Occupational health ignores the role of safety and worker training.
3. Industrial hygiene focuses on reducing exposure to workplace hazards.
4. The AAOHN defines occupational health nursing as unrelated to environmental hazards.
5. Ergonomics aims to improve job safety and reduce limitations.
6. Occupational health includes the study of toxicology to examine chemical exposures.
7. Industrial hygiene helps in identifying and evaluating workplace hazards.
8. Ergonomics focuses on minimizing workers' capabilities.
9. Occupational health nursing excludes the prevention of environmental hazards.
10. Occupational health nurses deliver health and safety programs to clients.
11. Occupational health nurses are responsible for compliance with OSHA regulations. →
12. Confidentiality of medical records is not a concern in occupational health nursing. →
13. Drug testing and technical support are part of occupational health nursing services. →
14. The Rehabilitation Act deals with handicap and preplacement evaluations. →
15. Threat of violence and duty to warn are unrelated to occupational health. →
16. The effectiveness of primary health care delivery at the worksite is part of occupational health nursing priorities. →
17. Stress and workplace hazards have no effect on worker health outcomes. →
18. Occupational health nurses must consider chemical exposures in the workplace. →
19. Ergonomic strategies are only about improving office furniture. →
20. Aging has no relationship with workplace hazards. →

III. Short Answer Questions

1. Define Occupational Health Nursing.

2. List three components included in occupational health.

3. What is the goal of industrial hygiene?

4. Mention one responsibility of occupational health nurses.

➤5- Name two knowledge domains of occupational health nursing. ➤

5. Define occupational health nursing according to the AAOHN. ➤

6. What are the main goals of occupational health?

7. What does occupational health nursing provide?

8. Mention two knowledge domains

9. Mention two government departments involved in occupational health compliance.

10. Explain the role of occupational health nurses in managing workplace injuries and illnesses.

.....

11. **What are two common occupational hazards for healthcare workers? →**

.....

12. **Why is stress management important in occupational health nursing? →**

.....

13. **What is meant by ergonomic strategies?**

.....

14. Give one example of a chemical hazard in the workplace.

.....

15. Explain how occupational health nurses can promote health and safety at the worksite.

.....

16. What is one of the main goals of occupational health nursing?

.....

18: What are some examples of occupational hazards for health care workers?

.....

19: What are the five categories of occupational hazards?

.....

20: What health effects can result from exposure to blood or body fluids

.....

21: Which chemical exposure can cause reproductive problems?

.....

22: What condition is caused by exposure to asbestos?

.....

23: What are some common health problems associated with noise exposure?

.....

Rural Health

I. Multiple Choice Questions (MCQs)

1. Rural health refers to:

- a) The health of people living in cities
 - b) The health of people living in rural areas, far from health facilities
 - c) The mental health of rural workers
 - d) None of the above
-

2. Which of the following diseases are rural residents at greater risk of dying from?

- a) Heart disease
 - b) Cancer
 - c) Stroke
 - d) All of the above
-

3. Which of the following is a major challenge for rural public health nurses?

- a) Providing access to quality healthcare
- b) Overcoming transportation problems
- c) Working with limited health resources

d) All of the above

4. What does the term “food desert” mean?

- a) An area with too many restaurants
- b) An area with limited access to healthy foods
- c) An area that produces only dry food
- d) A farming region

5. Which of the following is a role of rural community health nurses?

- a) Advocate
- b) Engineer
- c) Pharmacist
- d) Accountant

6. A nurse who connects rural clients with health and social services acts as a:

- a) Health teacher
- b) Referral agent
- c) Coordinator/Case manager
- d) Researcher

7. Who suggests new approaches based on research and community assessment?

- a) Mentor
- b) Change agent/Researcher
- c) Activist
- d) Collaborator

II. True or False

1. Rural residents have the same access to healthcare as urban residents.
2. Rural nurses play a vital role in helping their communities access healthcare services.
3. Chronic diseases such as heart disease and diabetes are less common in rural areas.
4. Rural residents are more likely to have multiple health conditions than urban residents.
5. Members of minority and tribal groups in rural areas are at higher risk for poor health outcomes.
6. Rural residents have more access to healthcare than urban residents.
7. Poverty is one of the major factors contributing to rural health disparities.
8. Nurses in rural areas do not need to collaborate with other professionals.
9. Health teachers educate individuals and families about health promotion topics.
10. An activist nurse works to improve the community's health through action and advocacy.

11. Members of minority and tribal groups in rural areas are at higher risk for poor health outcomes.
12. Rural residents have more access to healthcare than urban residents.
13. Poverty is one of the major factors contributing to rural health disparities.
14. Nurses in rural areas do not need to collaborate with other professionals.
15. Health teachers educate individuals and families about health promotion topics.
16. An activist nurse works to improve the community's health through action and advocacy.

III. Short Answer Questions

1. Define rural health.

.....

2. List three major causes of death among rural residents.

.....

3. Mention two challenges faced by rural public health nurses.

.....

4. Give examples of common chronic diseases in rural areas.

.....

5. Who are at higher risk for poor health outcomes within rural areas? Which of the

following is a role of rural community health nurses?

- a) Advocate
 - b) Engineer
 - c) Pharmacist
 - d) Accountant
-

6. A nurse who connects rural clients with health and social services acts as a:

- a) Health teacher
 - b) Referral agent
 - c) Coordinator/Case manager
 - d) Researcher
-

7. Who suggests new approaches based on research and community assessment? a) Mentor

- e) Change agent/Researcher
 - f) Activist
 - g) Collaborator
-

IV. True or False

1. Rural residents have the same access to healthcare as urban residents.
2. Rural nurses play a vital role in helping their communities access healthcare services.
3. Chronic diseases such as heart disease and diabetes are less common in rural areas.
4. Rural residents are more likely to have multiple health conditions than urban residents.

5. Members of minority and tribal groups in rural areas are at higher risk for poor health outcomes.
6. Rural residents have more access to healthcare than urban residents.
7. Poverty is one of the major factors contributing to rural health disparities.
8. Nurses in rural areas do not need to collaborate with other professionals.
9. Health teachers educate individuals and families about health promotion topics.
10. An activist nurse works to improve the community's health through action and advocacy.

V. Short Answer Questions

1. Define rural health.

.....

2. List three major causes of death among rural residents.

.....

3. Mention two challenges faced by rural public health nurses.

.....

4. Give examples of common chronic diseases in rural areas.

.....

.....

5. Who are at higher risk for poor health outcomes within rural areas? ➤

6. What is the role of community health nursing in rural health? ➤

7. List three causes of rural health disparities.

8. What is the role of a nurse as an advocate in rural health?

9. Define the role of a health teacher.

10. Explain the role of a collaborator.

[illegible]

Chapter (5) communicable and non communicabledisease

Define the following :-

- 1) Communicable disease
- 2) IHD (is chemic heart disease)
- 3) Stable Angina
- 4) Diabetes Mellitus
- 5) Cancer
- 6) C.O.P.D
- 7) Vulnerable
- 8) Lane parents
- 9) Chemo therapy
- 10) Emphysema
- 11) Chronic bronchitis

List the following .

- 1- Risk Factor of non-communicable disease
- 2- Signs and symptoms of ischemic heart disease
- 3- Signs and symptoms of D.M
- 4- Diagnostic evaluation of ischemic heart disease
- 5- Management of pt. With ischemic heart disease.
- 6- Methods for diagnosing Diabetes
- 7- Treatment of diabetes
- 8- Classify types of Cancer
- 9- How to diagnose Cancer
- 10- Treatment of C.O.P.D
- 11- Prevention of non-Communicable
- 12- Nursing role in Caring of pt with Non communicable disease.
- 13- Categories of vulnerable population.
- 14- Principles of Caring for vulnerable population
- 15- Care of vulnerable population.

Complete the following

- 1- Ischemic heart disease include
- 2- Acute Coronary syndrome include
- 3- Vasospastic angina is
- 4- Angina pectoris include
- 5- In unstable Angina May result in attack
- 6- Stable angina Can progress to
- 7- Ischemic heart disease pain often describe as ,
..... , and radiate in
- 8- D.m classified into.....,.....,.....,.....
- 9- , , , are signs and symptoms of D.M
- 10- Exercise lower blood glucose by
- 11- Cancer classified into
- 12- Surgery Can be When It's possible
- 13- Fab four Cardiacmedi Cation is , , ,
- 14- important of Calcium channel Blockers
..... , , ,
- 15- Beta blockers decrease
- 16- Radiation is used Commonly in
- 17- Chemotherapy uses drugs to treat Cancer.
- 18- Emphysema is
- 19- Chronic bronchitis is long Term .
- 20- Dis ability refers to
- 21- , Are from signs and symptoms of
C.O.P.D
- 22- , Are principles of Caring for
Vulnerable population.

True and false

- 1- unstable angina follow regular Pattern ()
 - 2- emphysema is long term inflammation of the airway ()
 - 3- Type I D.M treated with oral hypoglycemic ()
 - 4- Type II D.M May Controlled without medication ()
 - 5- homelessness means sleeping on the street ()
 - 6- Radiation Can be Curative If Cancer is generalized ()
 - 7- cytotoxic drugs can be used for cure ()
 - 8- chronic bronchitis is short Term inflammation of Air way ()
 - 9- mentally ill have psychiatric problems ()
 - 10- surgery commonly used in treatment of Cancer ()
-

choose the correct answer:

1-The Time interval between exposure to an infectious agent and The appearance of the first sign or symptom of the disease

- a. -Pandemic. b. Eradication
d. incubation Period. c. Direct droplet

2-route of escape of the pathogen from the reservoir as Respiratory secretions, blood.

- a. Infectious agent. b. Portal of exit
c. The reservoir. d. mode of transmission

3- [BCG] vaccine Administered to infants in prevention

- a. Typhoid.
- b. Hepatiti's C
- c. Pulmonary tuberculosis.
- d. - Covid 19.

4- Type of angina is caused by Coronary artery spasms and is serious.

- a. stable angina.
- b.unstable ang ina
- c. Prinzmetals angina.
- d. worsening angina

5- a group of Cells that grows out of Control. taking over the function of the affected organ

- a. Cancer.
- b. myocardial infarction.
- c. RaDiation.
- d. Angina Petori's

6-chemical therapy that uses to treat Cancer.

- a. Radiation.
- b. Insulin
- b. Cytotoxic drugs.
- c. oral Hypoglycemic medication-

7-Damage to the air sacs in the lungs.

- a. Chronic bronchitis
- b. Car Cinoma.
- c.Emphysema
- d.lymphomas

8-- long term inflammation of the air way.

- a. Cancer
- b. Chronic bronchitis
- c. Ischemic heart disease
- d. Variant angina

9-ECG is diagnostic evaluation for

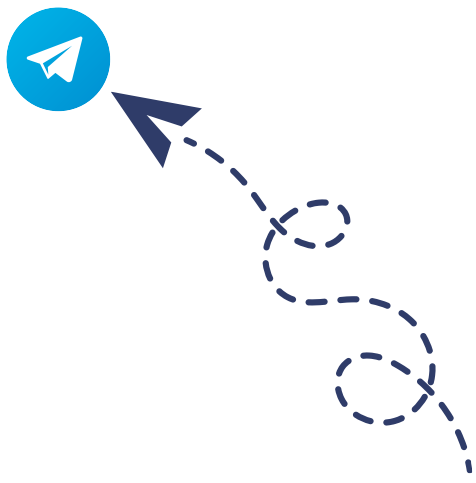

- a. Eischeimic heart disease
- b. malnutrition
- c.diabetes mellitus.
- c.Emphysema

10 one from the Chain of infection

- a. Endemic b. Incubation Period
- c. Portal of exit. d. Pandemic

Thank you.
